What it means to be "The Team Builders" ...

- We work with our clients to build the team necessary for a successful construction project.
- We assist our clients in identifying and defining their needs, in the solicitation, interviewing and selection of a design team, in the selection of a delivery system for the actual construction, and the solicitation, interviewing and selection of a construction services provider to put the construction in place.
- We help our clients "build their team."
- We work with our clients as their construction services provider under a fee basis, a GMP basis, or a lump sum basis. In each and every circumstance we see ourselves as working *with* our clients as opposed to *for* them.
- We operate as a member of the team providing a specific part of the overall project.
- We share the owner's goal of an on time, on budget, quality project and we recognize that this can only be accomplished through cooperation and teamwork amongst all the parties.
- Clear communications, accurate budgeting, defined scopes, reasonable schedules, quality vendors, skilled trade contractors and cooperation among the owner's team members guarantees a successful project.
- Recognition of this makes us "The Team Builders" - we build as a part of the project team. "
